

## Faster Carton Flow Pick & Putaway is a Snap!

**Snap-in entry guides and full-length dividers maximize SKU slots and improve pick speed and accuracy. Use our chart to match the right options with your carton flow product.**

Dyna-Flo and Dyna-Deck carton flow products create a full-wheel bed shelf to accommodate cases and totes of any size. With a quick Snap, you can physically segment SKU lanes to help your team achieve more productive and accurate putaway and picking.

### Carton Flow Entry Guides & Dividers

#### Advantages

- Easily clip into carton flow beds
- Faster reprofiling reduces labor costs
- Adjustable anywhere across the carton flow shelf
- Segments SKUs for faster picking
- Improves pick accuracy
- Maximizes SKU slots

## Full-Length Lane Divider Products

You have several types of lane guide and divider options to choose from - from easy snap-on entry guides for easy lane identification or a variety of full-length dividers designed for frequent reslotting and SKU changes.

### Slim-Fit Full-Length Lane Divider

New Slim-Fit full-length dividers are compatible with Dyna-Flo, Dyna-Flo HD, and Dyna-Deck replacement tracks. Our patent-pending design promotes quick installation and easy SKU reprofiling.

- Thin profile and 0.17" adjustability maximizes shelf space
- Mirrored image divider brackets speed accurate slotting & reslotting
- 5 color choices - mix and match
- Knock-down 3-piece design; easy to ship and assemble
- Secure fit double-action locking - won't dislodge
- To order -- Desired # of lanes +1 (e.g., 8 dividers for 7 lanes)

### Standard Full-Length Dividers (also available in HD)

Full-length dividers are adjustable along the entire storage shelf. The guide holders attach to the front and rear beams, and the steel connector rods simply slip into place connecting the two sides.

Mallard carton flow dividers are designed for quick and easy installation, each with a unique assembly process. Refer to the instructions below and watch our demonstration videos for a step-by-step guide on each lane divider product.

## To Install Slim-Fit Full-Length Dividers

1. The three-piece divider includes one center and two end pieces.
2. Using two workers—one on each side of the system—place the galvanized center component on top of the tracks where you want to create a lane.
3. Attach the end pieces to the center component to create the full-length divider.
4. Push the ends into the slotted holder to secure the divider.
5. Repeat as needed to create your custom shelf.

Note: Custom locking feature secures the holder and prevents over-rotation.

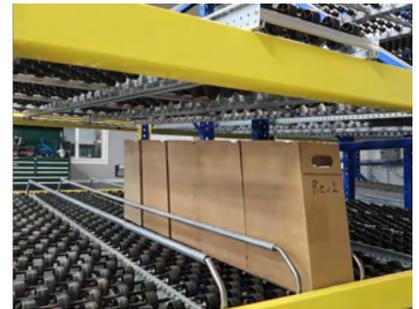

Video Demo

## To Install Standard & HD Dividers:

1. Secure custom mounting brackets to the inside of the front and rear beams.
2. Attach angled tubes to the bracket on the charge side.
3. Connect the long tube to the angled tubes.
4. Secure the final tube at the pick aisle to complete the full divider.

Video Demo

## To Install Snap-On Guides with Dividers

1. Snap the entry flags on your system's charge (load) side.
2. Adjust lane widths across the wheeled bed as needed.
3. Attach divider rod to end of entry flag. Add entry flags and dividers as needed to reach the opposite side.
4. Move to the discharge (pick) side, attach the entry flag onto the open side of the rod, and snap into place on the carton flow axle.
